INSTRUCTIONS: Assign an election officer (or high school page, in November elections) to track the below numbers throughout the day of election. They should inform you immediately if any numbers are not what they should be.

- As close to each hour as possible, enter the below numbers.
- If there are no voters in line at a given time, write “0”.
  - Do not count non-voters (e.g. children who are waiting with their parents).
  - “Voters checked in but not yet cast ballot” includes voters who are at the ballot table, in the voting booths, or in line at the ballot scanner.
  - [Voters checked in on Poll Pads] should always equal [voters checked in but not yet cast ballot] plus [ballots cast on DS200s]. If not, figure out why (e.g. an officer did not properly check in voters) and record in the Chief’s Notes.

What to do at the beginning of the day

- ☐ Print opening tapes from each DS200.
- ☐ Have two officers sign all four zero totals reports on opening tapes.

What to do at the end of the day

From each Poll Pad’s home screen, review the top tan banner for the number of voters checked in. If there is an EDR number, add it to the number of voters checked in. For example, if it says “Check-ins: 99 (EDR: 1)”, that is actually 99 + 1 = 100 voters.
